

AI Maturity: 6-Dimension Self-Check

Everyone on the leadership team scores themselves — from 1 (unclear) to 5 (led). Then compare. The dimension with the widest spread is your first topic, not your next tool.

	1	2	3	4	5
1 Strategy How clear is it where AI creates real value in your business — and where it is only hype?	1	2	3	4	5
2 Governance How clear are the decision paths for AI: who decides what, within which guardrails?	1	2	3	4	5
3 Capability How fluent are leadership and team on AI — beyond the buzzwords?	1	2	3	4	5
4 Culture How openly — rather than anxiously or arbitrarily — is AI handled in everyday work?	1	2	3	4	5
5 Data How accessible and reliable is your data, so that AI can carry weight at all?	1	2	3	4	5
6 Use Cases How concrete are your use cases in measurable value contribution — instead of “let’s give it a try”?	1	2	3	4	5

Clarity is not soft. It is the hardest growth measure there is. The self-check locates you — deciding what follows from it is leadership work.

Next step: AI Compass / 30-Minute AI Orientation · justgrow.eu

The AI Compass turns the maturity picture into prioritised use cases, guardrails and a 90-day roadmap — facilitated, with the entire leadership team. © 2026 JUSTGROW
